12				

Please list above if you are bringing a laptop to play sound cues or tracks.

If you are doing a staged reading with performers walking up to mics, please list the number of mics you need based on the max number of characters in one scene (including stage directions reader if necessary).

Reminders

- While the Studio has lavalier mics available, due to the size of the room, the necessity of micing performers for straight plays is very rare.
- The main stage maxes out at 8 wireless microphones (inclusive of both handhelds and lavalier/clip-ons). Up to 4 of these can be lavalier/clip-ons.
- The studio theater maxes out at 5 wireless microphones (inclusive of both handhelds and lavalier/clip-ons). Up to 2 of these can be lavalier/clip-ons.
